Chelation Therapy in the Treatment of Metal Intoxication presents a practical guide to the use of chelation therapy, from its basic chemistry, to available chelating antidotes, and the application of chelating agents. Several metals have long been known to be toxic to humans, and continue to pose great difficulty to treat. These challenges pose particular problems in industrial settings, with lead smelting known to be associated with hemopoietic alterations and paralyses, and the inhalation of mercury vapor in mercury mining being extremely detrimental to the central nervous system.

Clinical experience has demonstrated that acute and chronic human intoxications with a range of metals can be treated efficiently by administration of chelating agents. *Chelation Therapy in the Treatment of Metal Intoxication* describes the chemical and biological principles of chelation in the treatment of these toxic metal compounds, including new chelators such as meso-2,3-dimercaptosuccinic acid (DMSA) and D,L-2,3-dimercapto-1-propanesulfonic acid (DMPS).

- Presents all the current findings on the potential for chelation as a therapy for metal intoxication
- Presents practical guidelines for selecting the most appropriate chelating agent
- Includes coverage on radionuclide exposure and metal storage diseases
- Describes the chemical and biological principles of chelation in the treatment of toxic metal compounds

### **From reader reviews:**

#### **Raymond Hernandez:**

What do you in relation to book? It is not important along? Or just adding material when you need something to explain what you problem? How about your spare time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make you feel bored faster. And you have extra time? What did you do? Everyone has many questions above. They must answer that question mainly because just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need that Chelation Therapy in the Treatment of Metal Intoxication to read.

#### **Ryan Brown:**

Spent a free the perfect time to be fun activity to do! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, going to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Might be reading a book can be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to test look for book, may be the book untitled Chelation Therapy in the Treatment of Metal Intoxication can be very good book to read. May be it could be best activity to you.

#### **Jose Gould:**

The book Chelation Therapy in the Treatment of Metal Intoxication has a lot details on it. So when you check out this book you can get a lot of help. The book was authored by the very famous author. The author makes some research previous to write this book. This book very easy to read you can obtain the point easily after reading this book.

#### **Arlene Farrar:**

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is prepared or printed or illustrated from each source that will filled update of news. On this modern era like today, many ways to get information are available for anyone. From media social including newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just looking for the Chelation Therapy in the Treatment of Metal Intoxication when you necessary it?
