A helpful list of foreign and domestic organizations that issue standards is included. Successive chapters explore the role of standards in different types of libraries--a public library's science and technology department, a corporate library, an academic library, and the library of the National Institute of Standards and Technology (NIST). The final chapter addresses the role of Information Handling Services (IHS), a commercial source of all types of standards, discusses the range of standards services, and explains how information is acquired.
