Chapter 03, Near-Infrared, Mid-Infrared, and Raman Spectroscopy

Y. Pico

Chapter 03, Near-Infrared, Mid-Infrared, and Raman Spectroscopy Y. Pico

NOTE: This is a single chapter excerpted from the book *Chemical Analysis of Food: Techniques and Applications*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

Chemical Analysis of Food: Techniques and Applications reviews new technology and challenges in food analysis from multiple perspectives: a review of novel technologies being used in food analysis, an in-depth analysis of several specific approaches, and an examination of the most innovative applications and future trends. This book won a 2012 PROSE Award Honorable Mention in Chemistry and Physics from the Association of American Publishers.

The book is structured in two parts: the first describes the role of the latest developments in analytical and bio-analytical techniques and the second reviews the most innovative applications and issues in food analysis. Each chapter is written by experts on the subject and is extensively referenced in order to serve as an effective resource for more detailed information. The techniques discussed range from the non-invasive and non-destructive, such as infrared spectroscopy and ultrasound, to emerging areas such as nanotechnology, biosensors and electronic noses and tongues. Important tools for problem-solving in chemical and biological analysis are discussed in detail.

Winner of a PROSE Award 2012, Book: Honorable Mention in Physical Sciences & Mathematics - Chemistry and Physics from the American Association of Publishers.

- Provides researchers with a single source for up-to-date information in food analysis
- Single go-to reference for emerging techniques and technologies
- Over 20 renowned international contributors
- Broad coverage of many important techniques makes this reference useful for a range of food scientists

From reader reviews:

Julianna Pepper:

Nowadays reading books be than want or need but also get a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The info you get based on what kind of publication you read, if you want attract knowledge just go with schooling books but if you want feel happy read one having theme for entertaining for example comic or novel. Typically the Chapter 03, Near-Infrared, Mid-Infrared, and Raman Spectroscopy is kind of guide which is giving the reader erratic experience.

Helen Sullivan:

Typically the book Chapter 03, Near-Infrared, Mid-Infrared, and Raman Spectroscopy will bring someone to the new experience of reading the book. The author style to spell out the idea is very unique. If you try to find new book to learn, this book very suited to you. The book Chapter 03, Near-Infrared, Mid-Infrared, and Raman Spectroscopy is much recommended to you to learn. You can also get the e-book through the official web site, so you can more easily to read the book.

George Eichner:

The book untitled Chapter 03, Near-Infrared, Mid-Infrared, and Raman Spectroscopy contain a lot of information on the idea. The writer explains the girl idea with easy approach. The language is very simple to implement all the people, so do not worry, you can easy to read the idea. The book was written by famous author. The author provides you in the new age of literary works. You can read this book because you can continue reading your smart phone, or gadget, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site along with order it. Have a nice examine.

Kathryn Cortez:

As a student exactly feel bored in order to reading. If their teacher expected them to go to the library in order to make summary for some guide, they are complained. Just small students that has reading's heart or real their pastime. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring and can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Chapter 03, Near-Infrared, Mid-Infrared, and Raman Spectroscopy can make you truly feel more interested to read.
