Complex Geometry: Collection of Papers Dedicated to Hans Grauert

This volume contains a collection of research papers dedicated to Hans Grauert on the occasion of his seventieth birthday. Hans Grauert is a pioneer in modern complex analysis, continuing the illustrious German tradition in function theory of several complex variables of Weierstrass, Behnke, Thullen, Stein, Siegel, and many others. When Grauert came on the scene in the early 1950's, function theory was going through a revolutionary period with the geometric theory of complex spaces still in its embryonic stage. A rich theory evolved with the joint efforts of many great mathematicians including Oka, Kodaira, Cartan, and Serre. The Cartan Seminar in Paris and the Kodaira Seminar provided important venues for its development. Grauert, together with Andreotti and Remmert, took active part in the latter. In his career he has nurtured a great number of his own doctoral students as well as other young mathematicians in his field from all over the world. For a couple of decades his work blazed the trail and set the research agenda in several complex variables worldwide. Among his many fundamentally important contributions, which are too numerous to completely enumerate here, are: 1. The complete clarification of various notions of complex spaces. 2. The solution of the general Levi problem and his work on pseudoconvexity for general manifolds. 3. The theory of exceptional analytic sets. 4. The Oka principle for holomorphic bundles. 5. The proof of the Mordell conjecture for function fields. 6. The direct image theorem for coherent sheaves.

From reader reviews:

Tracie Wright:

Hey guys, do you really want to find a new book to see? Maybe the book with the title Complex Geometry: Collection of Papers Dedicated to Hans Grauert suitable to you? Typically the book was written by well known writer in this era. Often the book entitled Complex Geometry: Collection of Papers Dedicated to Hans Grauert is a single of several books that will everyone read now. This specific book was inspired many people in the world. When you read this book you will enter the new shape that you ever know ahead of. The author explained their thought in the simple way, consequently all of people can easily to understand the core of this e-book. This book will give you a great deal of information about this world now. So that you can see the represented of the world in this book.

Stephen Wilson:

Spent a free chance to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their friends. Usually they doing activity like watching television, gonna beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? Could be reading a book is usually option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to try look for book, maybe the e-book entitled Complex Geometry: Collection of Papers Dedicated to Hans Grauert can be great book to read. Maybe it could be best activity to you.

Bruce Smith:

The particular book Complex Geometry: Collection of Papers Dedicated to Hans Grauert has a lot info on it. So when you read this book you can get a lot of help. The book was compiled by the very famous author. The author makes some research just before write this book. That book very easy to read you can get the point easily after reading this article book.

Misty Ware:

A lot of publication has printed but it differs from the others. You can get it by internet on social media. You can choose the most effective book for you, science, comedy, novel, or whatever through searching from it. It is known as of book Complex Geometry: Collection of Papers Dedicated to Hans Grauert. Contain your knowledge by it. Without leaving behind the printed book, it could add your knowledge and make a person happier to read. It is most critical that, you must aware about publication. It can bring you from one location to other place.
