Disease-relevant intracellular protein-protein interactions occurring at defined cellular sites possess great potential as drug targets. They permit highly specific pharmacological interference with defined cellular functions. Drugs targeting such interactions are likely to act with fewer side effects than conventional medication influencing whole cell functions. This book discusses therapeutically relevant protein-protein interactions with a major focus on scaffolding proteins tethering signal transduction processes to defined cellular compartments by direct protein-protein interactions. Recent advances in the development of pharmacological agents interfering with protein-protein interactions are highlighted.

From reader reviews:

Kathleen Allen:

The book Protein-Protein Interactions as New Drug Targets: 186 (Handbook of Experimental Pharmacology) can give more knowledge and information about everything you want. Why then must we leave the great thing like a book Protein-Protein Interactions as New Drug Targets: 186 (Handbook of Experimental Pharmacology)? Wide variety you have a different opinion about book. But one aim this book can give many facts for us. It is absolutely suitable. Right now, try to closer along with your book. Knowledge or facts that you take for that, you are able to give for each other; you could share all of these. Book Protein-Protein Interactions as New Drug Targets: 186 (Handbook of Experimental Pharmacology) has simple shape nevertheless, you know: it has great and massive function for you. You can look the enormous world by start and read a e-book. So it is very wonderful.

Gloria Smith:

As people who live in the modest era should be revise about what going on or information even knowledge to make all of them keep up with the era that is certainly always change and move ahead. Some of you maybe will probably update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know which one you should start with. This Protein-Protein Interactions as New Drug Targets: 186 (Handbook of Experimental Pharmacology) is our recommendation so you keep up with the world. Why, because this book serves what you want and wish in this era.

Omar Carter:

People live in this new time of lifestyle always attempt to and must have the spare time or they will get lots of stress from both daily life and work.
