Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds

Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds

Enhanced concern for the quality and safety of food products, increased preference for natural products, and stricter regulations on the residual level of solvents, all contribute to the growing use of supercritical fluid technology as a primary alternative for the extraction, fractionation, and isolation of active ingredients. As a solvent-free process, supercritical fluid technology is a popular answer for the functional foods and nutraceutical sector, one of the fastest growing consumer driven markets. Recent advancements in the technology and increased utilization of the process demand a comprehensive, single-source review of current and future trends in supercritical fluid technology.

Compiling contributions from international experts in the field, **Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds** presents the state-of-the-science in the extraction and fractionation of bioactive ingredients by supercritical fluids. Focusing on implemented industrial processes and trends, it reviews the fundamentals of the technology and examines the economics of supercritical fluid extraction systems and processes. Over the course of twelve chapters, the book presents the supercritical fluid extraction processes in edible oils, including fish oils and specialty oils; herbs, such as Latin American plants and those used in Traditional Chinese Medicine; algae; spices; antioxidants and essential oils; as well as the processing of micro and nano-scale materials by supercritical fluid technology.

Each chapter covers the major active components in the target material, including chemical, physical, nutritional, and pharmaceutical properties; an analysis of the specific supercritical fluid process used; a comparison of traditional processing methods versus supercritical fluid technology; and a set of conclusions with supporting data and insight.

From reader reviews:

Michael Hamlin:

What do you concentrate on book? It is just for students since they are still students or the item for all people in the world, what the best subject for that? Simply you can be answered for that query above. Every person has different personality and hobby for every single other. Don't to be obligated someone or something that they don't wish do that. You must know how great along with important the book Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds. All type of book could you see on many resources. You can look for the internet methods or other social media.

Gregory Throop:

This Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds are generally reliable for you who want to be a successful person, why. The reason why of this Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds can be one of several great books you must have is giving you more than just simple reading through food but feed an individual with information that might be will shock your prior knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed kinds. Beside that this Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds giving you an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that we know it useful in your day activity. So , let's have it and revel in reading.

Valerie Bell:

The publication untitled Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds is the book that recommended to you you just read. You can see the quality of the reserve content that will be shown to you. The language that creator use to explained their ideas are easily to understand. The writer was did a lot of investigation when write the book, therefore the information that they share for you is absolutely accurate. You also might get the e-book of Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds from the publisher to make you far more enjoy free time.

William Fields:

It is possible to spend your free time to learn this book this guide. This Supercritical Fluid Extraction of Nutraceuticals and Bioactive Compounds is simple to develop you can read it in the recreation area, in the beach, train as well as soon. If you did not have got much space to bring the particular printed book, you can buy typically the e-book. It is make you quicker to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
