Advancing Land Change Modeling: Opportunities and Research Requirements Committee on Needs and Research Requirements for Land Change Modeling

People are constantly changing the land surface through construction, agriculture, energy production, and other activities. Changes both in how land is used by people (land use) and in the vegetation, rock, buildings, and other physical material that cover the Earth's surface (land cover) can be described and future land change can be projected using land-change models (LCMs). LCMs are a key means for understanding how humans are reshaping the Earth's surface in the past and present, for forecasting future landscape conditions, and for developing policies to manage our use of resources and the environment at scales ranging from an individual parcel of land in a city to vast expanses of forests around the world.

Advancing Land Change Modeling: Opportunities and Research Requirements describes various LCM approaches, suggests guidance for their appropriate application, and makes recommendations to improve the integration of observation strategies into the models. This report provides a summary and evaluation of several modeling approaches, and their theoretical and empirical underpinnings, relative to complex land-change dynamics and processes, and identifies several opportunities for further advancing the science, data, and cyberinfrastructure involved in the LCM enterprise. Because of the numerous models available, the report focuses on describing the categories of approaches used along with selected examples, rather than providing a review of specific models. Additionally, because all modeling approaches have relative strengths and weaknesses, the report compares these relative to different purposes. *Advancing Land Change Modeling's* recommendations for assessment of future data and research needs will enable model outputs to better assist the science, policy, and decisionsupport communities.

From reader reviews:

Robert Glass:

With other case, little folks like to read book Advancing Land Change Modeling: Opportunities and Research Requirements. You can choose the best book if you want reading a book. Given that we know about how is important a new book Advancing Land Change Modeling: Opportunities and Research Requirements. You can add expertise and of course you can around the world by the book. Absolutely right, mainly because from book you can understand everything! From your country until foreign or abroad you will end up known. About simple matter until wonderful thing you may know that. In this era, we are able to open a book or perhaps searching by internet gadget. It is called e-book. You may use it when you feel fed up to go to the library. Let's study.

Ismael Roop:

What do you concentrate on book? It is just for students because they're still students or the idea for all people in the world, what best subject for that? Merely you can be answered for that problem above. Every person has different personality and hobby per other. Don't to be compelled someone or something that they don't would like do that. You must know how great along with important the book Advancing Land Change Modeling: Opportunities and Research Requirements. All type of book are you able to see on many solutions. You can look for the internet resources or other social media.

Stephanie Wilkes:

Reading a e-book can be one of a lot of task that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a book will give you a lot of new facts. When you read a publication you will get new information since book is one of numerous ways to share the information or their idea. Second, reading through a book will make you more imaginative. When you studying a book especially tale fantasy book the author will bring you to imagine the story how the people do it anything. Third, you could share your knowledge to some others. When you read this Advancing Land Change Modeling: Opportunities and Research Requirements, you may tells your family, friends and soon about yours guide. Your knowledge can inspire different ones, make them reading a reserve.

Mary Stockton:

Reading a publication tends to be new life style in this particular era globalization. With examining you can get a lot of information that may give you benefit in your life. With book everyone in this world may share their idea. Publications can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or perhaps their experience. Not only the storyplot that share in the publications. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors on this planet always try to improve their expertise in writing, they also doing some study before they write to the book. One of

them is this Advancing Land Change Modeling: Opportunities and Research Requirements.
