## Modern Nucleophilic Aromatic Substitution Francois Terrier

This book provides a comprehensive overview of nucleophilic aromatic substitutions, focusing on the mechanistic and synthetic features that govern these reactions.

The first chapter presents a detailed mechanistic analysis of the factors determining the feasibility of S<sub>N</sub>Ar substitutions, providing decisive information to predict regioselectivity of many reactions and to define the conditions for concerted S<sub>N</sub>Ar processes. Reflecting the key role played by these species as intermediates in most S<sub>N</sub>Ar reactions, chapter 2 then discusses the chemistry of anionic sigma-complexes. Chapter 3 describes the concept of superelectrophilicity in S<sub>N</sub>Ar substitutions, as it has recently emerged from the reactivity of strongly electron-deficient aromatic and heteroaromatic structures. The numerous synthetic applications are considered in depth in the chapters 4 and 5 that follow on intermolecular and intramolecular nucleophilic aromatic substitutions. Then, chapter 6 focuses on substitutions proceeding formally through displacement of a hydride ion, a hot topic in the field. The final chapter brings together concise yet comprehensive discussions surrounding S<sub>N</sub>Ar photosubstitutions, radical substitutions, and ANRORC substitutions.

Authored by a highly respected chemist who has contributed greatly to the field over the past two decades, this is a valuable information source for all organic chemists working in academia or the pharmaceutical and agrochemical industries.

### **From reader reviews:**

#### **Gwendolyn Harrison:**

As people who live in the modest era should be upgrade about what going on or information even knowledge to make them keep up with the era that is always change and move forward. Some of you maybe can update themselves by studying books. It is a good choice to suit your needs but the problems coming to you is you don't know which you should start with. This Modern Nucleophilic Aromatic Substitution is our recommendation so you keep up with the world. Why, because book serves what you want and want in this era.

#### **Lisa Mercado:**

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their sparetime with their family, or their own friends. Usually they performing activity like watching television, likely to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Can be reading a book could be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to attempt look for book, may be the book untitled Modern Nucleophilic Aromatic Substitution can be excellent book to read. May be it might be best activity to you.

#### **Earl Parker:**

A lot of people always spent their particular free time to vacation or go to the outside with them loved ones or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity this is look different you can read a new book. It is really fun for you. If you enjoy the book that you just read you can spent all day long to reading a book. The book Modern Nucleophilic Aromatic Substitution it doesn't matter what good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. When you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore very easily to read this book from the smart phone. The price is not very costly but this book possesses high quality.

#### **William Henderson:**

Reading a book to get new life style in this season; every people loves to examine a book. When you study a book you can get a lot of benefit. When you read publications, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself read a fiction books, these us novel, comics, and soon. The Modern Nucleophilic Aromatic Substitution provide you with a new experience in examining a book.
