This volume brings together for the first time in a single volume the highly significant works on ancient Egyptian religion by Aylward Manley Blackman (1883-1956). Blackman's knowledge of Egyptian religion was unrivalled. He was best known for his series of studies on Egyptian religion which have long been regarded as essential reading in the subject, and which forms the content of the present collection. Unusually, Blackman did not publish his writings in book form, but preferred to place them in a wide range of publications that are extremely difficult to obtain. Blackman's studies on Egyptian religious belief and particularly religious practice focus on areas of fundamental concern and are models of meticulous, sympathetic and penetrating scholarship. They should remain required reading for all students of Egyptian religion well into the next century. All those with an interest in the subject should welcome this volume which makes Blackman's writings accessible in a convenient form. A select bibliography provides an update and key to more recent work on topics discussed by Blackman.
