**Head First Physics: A learner's companion to mechanics and practical physics (AP Physics B - Advanced Placement)** Heather Lang

Wouldn't it be great if there were a physics book that showed you how things work instead of telling you how? Finally, with *Head First Physics*, there is. This comprehensive book takes the stress out of learning mechanics and practical physics by providing a fun and engaging experience, especially for students who "just don't get it."

*Head First Physics* offers a format that's rich in visuals and full of activities, including pictures, illustrations, puzzles, stories, and quizzes -- a mixed-media style proven to stimulate learning and retention. One look will convince you: This isn't mere theory, this is physics brought to life through real-world scenarios, simple experiments, and hypothetical projects. *Head First Physics* is perfect for anyone who's intrigued by how things work in the natural world.

You'll quickly discover that physics isn't a dry subject. It's all about the world we live in, encompassing everything from falling objects and speeding cars, to conservation of energy and gravity and weightlessness, and orbital behavior. This book:

- Helps you *think* like a physicist so you can understand why things really work the way they do
- Gives you relevant examples so you can fully grasp the principles before moving on to more complex concepts
- Designed to be used as a supplement study guide for the College Board's Advanced Placement Physics B Exam
- Introduces principles for the purpose of solving real-world problems, not memorization
- Teaches you how to measure, observe, calculate -- and yes -- how to do the math
- Covers scientific notation, SI units, vectors, motion, momentum conservation, Newton's Laws, energy conservation, weight and mass, gravitation and orbits, circular motion and simple harmonic motion, and much more

If "Myth Busters" and other TV programs make you curious about our physical world -- or if you're a student forced to take a physics course -- now you can pursue the subject without the dread of boredom or the fear that it will be over your head. *Head First Physics* comes to rescue with an innovative, engaging, and inspirational way to learn physics!

### **From reader reviews:**

#### **Joyce Burke:**

What do you with regards to book? It is not important together with you? Or just adding material when you really need something to explain what your own problem? How about your spare time? Or are you busy man? If you don't have spare time to perform others business, it is make you feel bored faster. And you have spare time? What did you do? All people has many questions above. They must answer that question since just their can do which. It said that about book. Book is familiar in each person. Yes, it is proper. Because start from on kindergarten until university need this Head First Physics: A learner's companion to mechanics and practical physics (AP Physics B - Advanced Placement) to read.

#### **Jessie Henricks:**

Information is provisions for folks to get better life, information today can get by anyone on everywhere. The information can be a knowledge or any news even an issue. What people must be consider whenever those information which is in the former life are challenging to be find than now's taking seriously which one works to believe or which one the resource are convinced. If you get the unstable resource then you get it as your main information there will be huge disadvantage for you. All of those possibilities will not happen throughout you if you take Head First Physics: A learner's companion to mechanics and practical physics (AP Physics B - Advanced Placement) as your daily resource information.

#### **James Buscher:**

In this period globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you personally is Head First Physics: A learner's companion to mechanics and practical physics (AP Physics B - Advanced Placement) this book consist a lot of the information of the condition of this world now. That book was represented just how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. The actual writer made some analysis when he makes this book. This is why this book suitable all of you.

#### **Bernadine Parker:**

As a pupil exactly feel bored to reading. If their teacher expected them to go to the library or to make summary for some publication, they are complained. Just very little students that has reading's spirit or real their interest. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring and can't see colorful pics on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country.

Therefore this Head First Physics: A learner's companion to mechanics and practical physics (AP Physics B - Advanced Placement) can make you feel more interested to read.
