Semantic Analysis and Understanding of Human Behavior in Video Streaming Alberto Amato, Vincenzo Di Lecce, Vincenzo Piuri

Semantic Analysis and Understanding of Human Behaviour in Video Streaming investigates the semantic analysis of the human behaviour captured by video streaming, and introduces both theoretical and technological points of view. Video analysis based on the semantic content is in fact still an open issue for the computer vision research community, especially when real-time analysis of complex scenes is concerned.

This book explores an innovative, original approach to human behaviour analysis and understanding by using the syntactical symbolic analysis of images and video streaming described by means of strings of symbols. A symbol is associated to each area of the analyzed scene. When a moving object enters an area, the corresponding symbol is appended to the string describing the motion. This approach allows for characterizing the motion of a moving object with a word composed by symbols. By studying and classifying these words we can categorize and understand the various behaviours. The main advantage of this approach lies in the simplicity of the scene and motion descriptions so that the behaviour analysis will have limited computational complexity due to the intrinsic nature both of the representations and the related operations used to manipulate them. Besides, the structure of the representations is well suited for possible parallel processing, thus allowing for speeding up the analysis when appropriate hardware architectures are used. A new methodology for design systems for hierarchical high semantic level analysis of video streaming in narrow domains is also proposed. Guidelines to design your own system are provided in this book.

Designed for practitioners, computer scientists and engineers working within the fields of human computer interaction, surveillance, image processing and computer vision, this book can also be used as secondary text book for advanced-level students in computer science and engineering.

From reader reviews:

Irving Hansen:

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite e-book and reading a book. Beside you can solve your problem; you can add your knowledge by the guide entitled Semantic Analysis and Understanding of Human Behavior in Video Streaming. Try to the actual book Semantic Analysis and Understanding of Human Behavior in Video Streaming as your close friend. It means that it can to become your friend when you really feel alone and beside that of course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you more confidence because you can know anything by the book. So , let us make new experience and knowledge with this book.

Megan Fairbanks:

As people who live in the particular modest era should be revise about what going on or details even knowledge to make these people keep up with the era which can be always change and make progress. Some of you maybe can update themselves by reading books. It is a good choice for you personally but the problems coming to you actually is you don't know what type you should start with. This Semantic Analysis and Understanding of Human Behavior in Video Streaming is our recommendation so you keep up with the world. Why, because book serves what you want and wish in this era.

Alma Young:

As a university student exactly feel bored to reading. If their teacher asked them to go to the library or make summary for some book, they are complained. Just little students that has reading's soul or real their hobby. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that looking at is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Semantic Analysis and Understanding of Human Behavior in Video Streaming can make you sense more interested to read.

Ramona Wrenn:

A lot of people said that they feel bored stiff when they reading a reserve. They are directly felt this when they get a half regions of the book. You can choose the particular book Semantic Analysis and Understanding of Human Behavior in Video Streaming to make your reading is interesting. Your skill of reading expertise is developing when you similar to reading. Try to choose basic book to make you enjoy to study it and mingle the sensation about book and reading especially. It is to be 1st opinion for you to like to wide open a book and go through it. Beside that the e-book Semantic Analysis and Understanding of Human Behavior in Video Streaming can to be your brand new friend when you're really feel alone and confuse with

the information must you're doing of these time.
